

INTERNATIONAL SOLIDARITY

ASSISTANCE FOR HAITI DISASTER VICTIMS

During its meeting in Sydney, Australia, on 17 and 18 January 2010, the UIA Council expressed its heartfelt emotion following the earthquake that hit Haiti on January 12.

Stressing the importance of **prevention measures**, and particularly the specific construction methods that must be mastered by architects and applied to **all buildings constructed in areas at risk**, the UIA Council invited the architects of the world and its Member Sections to **contact humanitarian organisations present in the area in order to offer their help to the people of Haiti**.

The UIA fully supports the initiatives of the **Emergency Architects Foundation** that since 15 January has set up, in Haiti, an action team composed of experts from France, the West Indies and Canada. The task facing them is the **technical evaluation of the damaged buildings to guarantee the safety of the population as rapidly as possible**.

UIA FORUM

BANGKOK, ARCHITECTURE AND EQUILIBRIUM

The **Association of Siamese Architects (ASA)** will welcome architects from around the world, from **28 April to 1st May 2010**, to a UIA international forum in Bangkok. The theme, ' **Equilibrium** ', will look at the dynamism of the various forms of architectural practice that reach harmonious and balanced solutions thanks, notably, to the integration of the past and the extrapolation to the future. Speakers are expected from all over the world. UIA Bureau members will participate in the forum and meet in Bangkok on **29 and 30 April 2010**. **Anyone interested in attending, from any region, is most welcome**.

INTERNATIONAL STUDENT COMPETITION

A FRESH LOOK AT 20TH CENTURY ARCHITECTURAL HERITAGE

Students of architecture who wish to take part in this international competition for **image modelling of buildings that are significant of 20th century architectural design** throughout the world, can **register on-line until 26 March 2010**.

The competition invites the future architects to express their reading of a significant example of the architecture of the last century using today's design tools. Proposals, based on digital photos, have to be created using the Autodesk® Image Modeler™ and Autodesk® Stitcher™ Unlimited software. **Please encourage students from your region to take part**.

FRANCE

BUILD WITH AN ARCHITECT

The National Council of the Order of French Architects (CNOA) has published a book addressed to architects' clients. *Build with an architect* describes the role of the architect and provides replies to **practical questions** clients ask themselves and thus informs and enlightens them on the **missions of practitioners and the advantages of their contributions** throughout the design and realisation process.

It is free of charge, and available in French on request by sending your postal address to:

infodoc@cnoa.com

It may be downloaded (pdf) at the following address:

CANADA

A MAGAZINE FOR PUBLIC AND INSTITUTIONAL ADMINISTRATORS

The Royal Architectural Institute of Canada publishes, twice a year, an on-line magazine addressed to **public and institutional administrators**. Each issue focuses on a particular theme: High-performance buildings-Reaching New Heights; Innovative design goes to school; Architects bringing 'life' to health-care design. Each theme is widely illustrated with recent realisations in Canada. The latest issue is devoted to innovative justice centres. This editorial initiative, educational and informative, guarantees also the promotion of architectural quality and that of the Canadian architects.

VILAMOURA

SUSTAINABLE BUILDING AFFORDABLE TO ALL

From 17 to 19 March 2010 an international conference on the subject of sustainable building affordable to all will be held in Vilamoura, Portugal. This scientific conference will be organised jointly by the International Council for Building, the United Nations Environment Programme and the International "Initiative for a Sustainable Built Environment". Speakers, academics and researchers, will focus on identifying policies, solutions and results permitting the construction of buildings that are gentle to the environment at an affordable cost.
